APPLICATION DEVELOPMENT PRACTICES

Project Orientation

Director's Overview

- Our Company
- The Opportunity
- What We Need

ABC Systems History

- ABC Systems has, to date, been a service oriented company
- ABC Systems has a customer that has given us some code to support:
 - JDice

The Opportunity

- JDice is a small part of a much larger software package
- What does your team recommend as the best way for ABC Systems to support the JDice code?
 - Current code is buggy. Can we fix it?
 - Current code won't build. Can we build it?
 - Is the code good enough to release?

The Opportunity

- The customer is looking to form a partnership with ABC Systems
- The customer wants to know what processes we'll use (because they have had problems with previous suppliers)

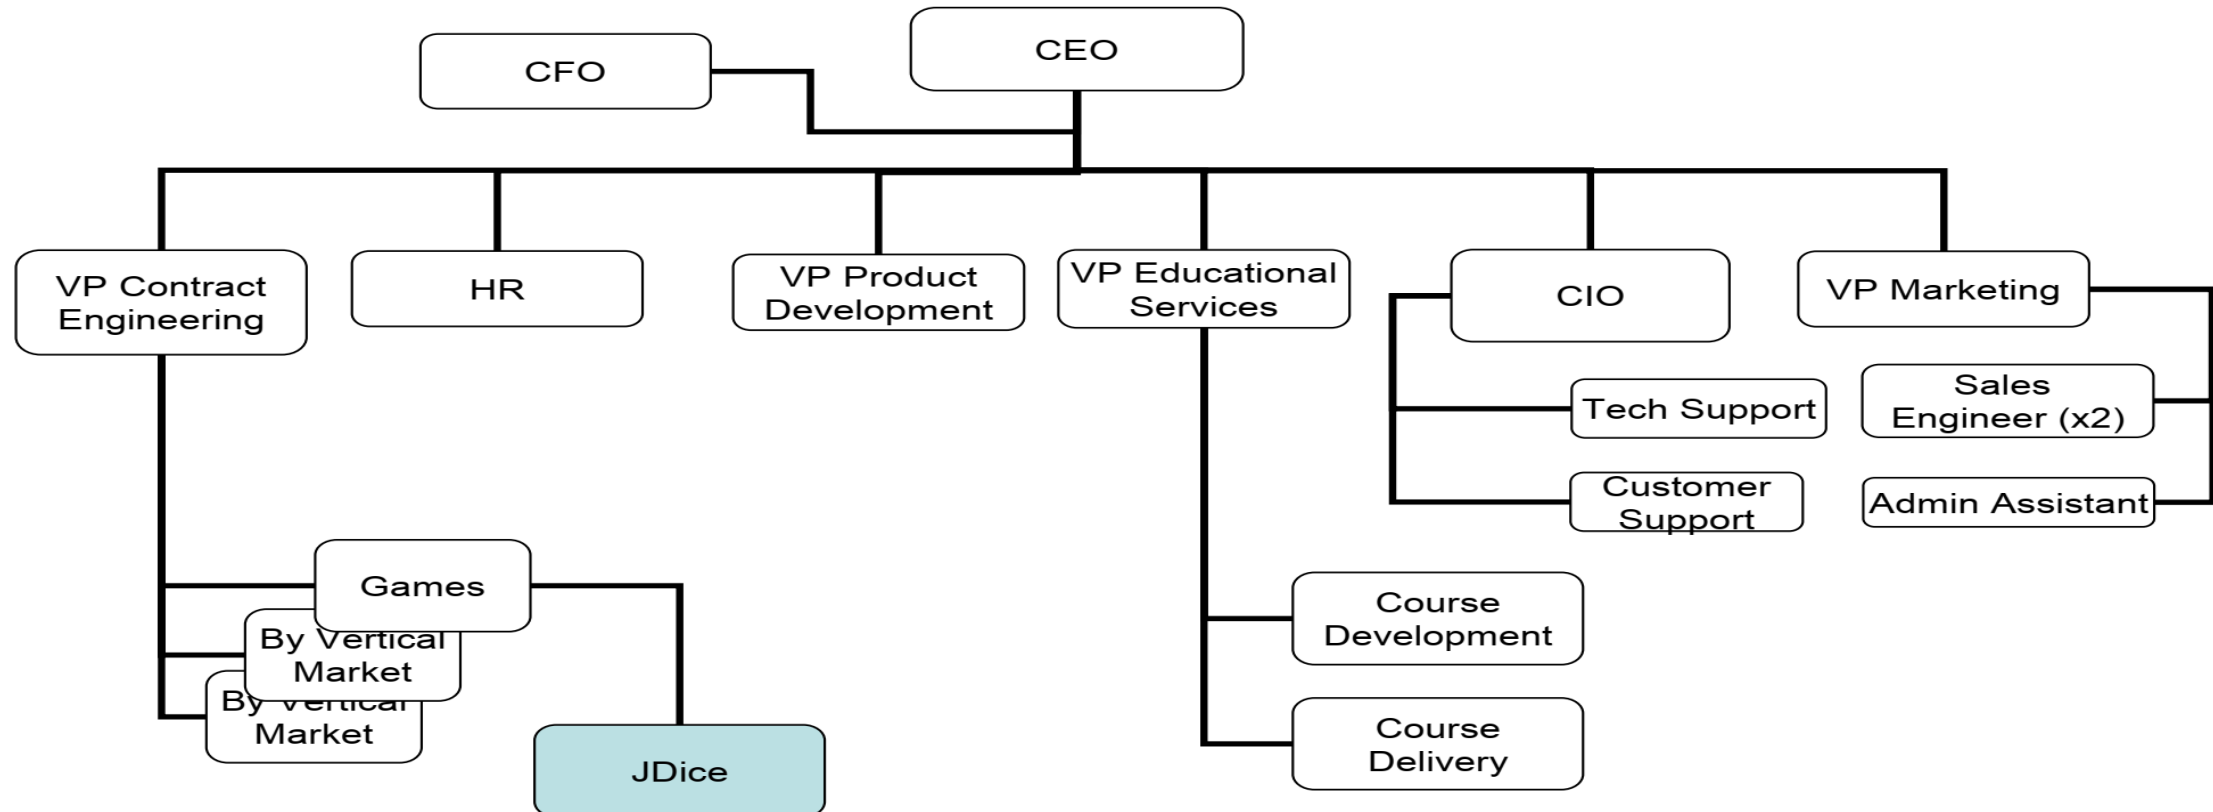

JDice Profit Potential

- JDice profit potential is very good if we can set up some good processes and impress our customer with our ability to support his products
- Key customer wants to give us more business
- Time is of the essence

ABC Systems Organization Chart

Your Assignment

- Other teams in the organization are all over the place in terms of:
 - Effectiveness of processes used
 - Teamwork
- Your management wants you to recommend several key processes for managing software
 - Technical Review
 - Configuration Management
 - Change Management

ABC Systems Beliefs

- Engineering discipline and the scientific method are critical skills for software intensive systems
 - The skills to make and then honor business commitments in ways that:
 - Delight our customer today and tomorrow
 - Leave our firm better prepared for the future
 - The skills to understand our current productivity, and how we can improve

Basic Measurement

- Weekly 1-page Status Reports
 - Each person must submit a status report
 - What I did last week
 - What I will accomplish next week
 - Any Notes, Issues or Roadblocks
- Effort logs
 - Capture the amount of effort you spend on each task you are assigned
